COUNTER RUST™ CA-407 Metal Protection
NSF HX-1 approved highly overbased calcium sulfonate

Application

Counter Rust CA-407 is an oil-soluble, highly overbased calcium sulfonate with NSF HX-1 approval. It provides excellent corrosion protection in mill, slushing and hydraulic oils, short term rust preventives, coatings and greases. It is an excellent calcium grease feed.

Typical Properties

Test	Typical
Appearance	Dark fluid
Specific gravity at 15.6° C	1.20
Total base number, mg KOH/g	400
Total calcium, wt. %	15.2
Total calcium sulfonate, wt. %	20.5
Kosher and NSF HX-1 Approval	Yes

Benefits

- Excellent calcium grease feed for greases requiring HX-1 approval
- Good dispersant and corrosion inhibitor
- Provides alkalinity
- Detergent and dispersant in lubricating oils

Storage and Handling

Recommended Max Long Term Storage Temperature	Ambient
Flash Point	204° C
